ADA COMPLIANT LOCKERS

Tennsco ADA Compliant Lockers are specifically designed to provide easier access to contents from a seated position. This is achieved through your choice of a bottom riser to raise the lower shelf, an ADA compliant keyless lock, and reduced-height upper shelf and coat hooks.

The special ADA compliant lock allows the locker to be opened by simply inserting the key. No turning of the key is required, allowing for single-handed operation.

The bottom riser raises items stored on the bottom shelf to a more reachable level.

The reduced height upper shelf and coat hooks bring items normally stored high in the locker down to a reachable level.

Tennsco will modify several of our standard lockers, offering a variety of choices. ADA Compliant Lockers are available for single tier, double tier (bottom locker only), and triple tier (bottom two lockers only) lockers, and can be custom ordered with the ADA features below. Call factory for details. You may also convert your existing lockers to be ADA compliant by ordering the options below.

All ADA Compliant Lockers are shipped with the universal handicap symbol.

Call factory for ADA Lock options.
